

**ANJUMAN COLLEGE OF ENGINEERING & TECHNOLOGY**  
**SADAR, NAGPUR,**

**LIBRARY REPORT FOR NAAC (2022-23)**

**4.2.1 Library is automated using Integrated Library Management System (ILMS)**

- Name of Software: SyNchRonik SOFTLIB
- Year of Software Purchase: 2006
- Year of Library Automation: 2006
- Software Version: 5.0

The library of this institute was established in the year 1999. This library has been a fully computerized (Automated) library since the year 2006; a library management system is software that is designed to manage all the functions of a library. It helps the librarian to maintain the database of new books and the books that are borrowed by members along with their due dates. This system completely automates for library's activities. The best way to maintain, organize, and handle countless books systematically is to implement a library management system software.

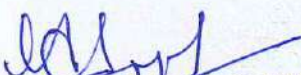

A library management system is used to maintain library records. It tracks the records of the number of books in the library, how many books are issued, or how many books have been returned or renewed or late fine charges, etc.

Users can find books in an instant, issue/reissue books quickly, and manage all the data efficiently and orderly using this system. The purpose of a library management system is to provide instant and accurate data regarding any type of book, thereby saving a lot of time and effort.

<b>4.2.1</b>	<b>Library is automated using integrated Library Management System (ILMS)</b>
