

Best practice 2

1. Title of the Practice: -

Massive Open Online Courses (MOOCs) Certification Courses (such as NPTEL, SWAYAM, Coursera, Udemy, etc.) constitute one of the most innovative movements within open learning. As they are constantly evolving they create new learning opportunities in higher education.

2. Objectives of the Practice: -

- To enable students, gain advanced technological and subject knowledge through video lectures prepared by IITs, IISc and IIMs.
- To promote continuous professional development through self-learning and life-long learning.
- To impart life skills, develop the personality and communication skills.
- To motivate the students for joining the courses beyond curriculum or to join the interdisciplinary course of their interest.

3. The Context: -

MOOC courses offers open online courses along with certification in various Engineering Disciplines, Sciences, Humanities, Management and Research which provide relevant exposure to tools and technologies. This facilitates flexibility for the students to prioritize the time at their own pace and comfort. In order to gain in-depth knowledge and mastery learning of various components of the curriculum, the students can opt for courses from the same or interdisciplinary courses. The modular structure of these courses is learner friendly and enables participants to move smoothly along the spiral of learning.

4. The Practice: -

1. With the commencement of academic session, students were informed about the various online certification courses available. They are then motivated to register on the platform and enroll in the course of their choice.
2. Once they enroll themselves, they receive course material which they have to go through and after stipulated time, they have to submit the assignments.
3. On successful submission of all the assignments and Online Exams, the respective organization issues the certificate of completion of the course.
