MANGALWARI BAZAAR ROAD, SADAR, NAGPUR - 440001.

Managed By Anjuman Hami-E-Islam, Nagpur

ACADEMIC SESSION 2020-2021

BEST PRACTICE-1

1. Title of Practice:

Bridging the gap between industry expectations and academic curricula by signing INDUSTRY-INSTITUTE MOU's

2. Objective of the Practice:

1. To sign an INDUSTRY-INSTITUTE MOU's, reduces the gap between industry expectations and academic curricula by direct participation of industry through mutual agreement.
2. To nurture and encourage students on their learning environment, in order to develop their practical skills, improves their performance, so that they become a successful engineer.
3. To establish relationship between industry and the institute for promoting industrial exposure, for students training & faculty training, so that industry problems and its solutions can be developed.
4. To provide access to laboratory testing and guide students for campus placements activities.

3. The Context:

In the context of medium/ small-scale industries, the needs are primarily oriented towards problem solving, with the support required in the areas of design, process improvement and deployment, etc. These institutes can be also intervene in solving specific industry related problems, carry out minor technological Innovations/modifications aimed at latest absorption/implementation technology. Industries in turn can contribute to academia in orienting its curriculum to produce graduate engineers.

4. The Practice:

Such agreement would promote:

- Industry Visits/ Training to students and expert lectures on Industrial Knowledge
- Conduction of Seminars, Workshops, Session Speaker, Continuing education programs etc.
- Research collaborations, provide solutions to automation, analytical testing.
- Guide students for campus placements.

ACADEMIC SESSION 2020-2021

5. Evidence of Success: (Copies of MOU Attached)

Industry Name	Contact Person	Date of MOU Signed	Duration
Uttar Pradesh Transmission Corporation Ltd. Lucknow	Dr. V. K. Khare Director (P.M. & A) UP PTCL Lucknow	November 2020	3 years
Firdos Refrigeration, Nagpur	Mr. Mohammed Akhtar Ansari	November 2020	3 years
Techintern (Upstart Edutech Pvt Ltd.)	Mr. Mahesh Rakheja Director	February 2020	2 Years
Shriram Construction	Mr. Ganesh B. Sharma	February 2018	3 Years
Yashodhara Bahudeshiya Sangh	Mr. Philips (Managing Director)	February 2018	3 years
Elite Academy	Mr. Shadeep Walde (Director)	September 2018	3 years
Maximum Solutions	Mr. Dinesh W. Nimbalkar (Managing Director)	July 2018	3 Years
Lasenor, Butibori, Nagpur	(Managing Director)	June 2018	Upto 31.05.2020
EuroCao Foods India Pvt. Ltd. Nagpur	(Managing Director)	June 2018	Upto 31.05.2020

6. Problems Encounters and Resources Required:
No Problems encountered

7. Outcomes

- In turn Industry gains pool skill manpower and which increased productivity by consuming less time.
- Faculty achieves by way of exposure to latest industry practices for more effective teaching-learning processes, etc.
- Student achieves by way of hands-on training, reduction of learning curve in industrial practices and society stands to gain by way of improved quality of goods and services.

MEMORANDUM OF UNDERSTANDING (MOU)

14 MAR 2018

BETWEEN

ANJUMAN COLLEGE OF ENGINEERING & TECHNOLOGY, NAGPUR

AND

TECHINTERN, NAGPUR.

THE MOU is entered into ___ day of February 2020, by ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY and TECHINTERN (UpStart Edutech Pvt Ltd).

TECHINTERN (UpStart Edutech Pvt Ltd) is a company incorporated under the Indian Companies Act, 2015 having its registered office at Nagpur and represent by its undersigned of the ONE PART.

AND

ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY, College represent by undersigned of the OTHER PART.

Whereas TECHINTERN and ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY shall be here in after jointly referred to as the "Parties" and singularly as a "Party".

The Party No.-1 & Party No.-2 have decided to agree to establish industry academic collaboration in area of mutual interest and in accordance with terms and conditions set forth in this Memorandum of

Understanding (MoU), TECHINTERN and ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY agree on following activities:

Dr. SYED MOHAMMAD ALI
Principal
Anjuman College of Engineering
& Technology, Sadar, Nagpur.

Dr. Syed Mohammad Ali

Dr. Syed Mohammad Ali

1. TECHINTERN will offer summer/winter Internship to students of ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY at TECHINTERN so that the students get hands on experience of live project & live research. The number of students, who can be selected for internship, would be based on some criteria and exam.
2. TECHINTERN will arrange to provide periodic Industrial visits to students and faculty of ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY at its sites to enable them to get practical exposure and learning from interaction with staff members of TECHINTERN's research team.
3. Depending on requirement TECHINTERN may offer specific assignments with identified deliverable to be executed by ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY. Detail modalities including financial would be mutually worked out for each assignment/project.
4. TECHINTERN may participate in campus placements to hire talent from ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY
5. ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY will give preference to officials of TECHINTERN in pursuing advanced Research and Development to students as per TECHINTERN's requirement.
6. TECHINTERN may arrange technical workshops/Forum/Guest lecture in ANJUMAN COLLEGE OF ENGINEERING AND TECHNOLOGY for faculty and students. Detail modalities including financial would be mutually worked out for each workshop/forum.
7. The parties mutually agree to share the information in hard and soft form available with them in strict confidence and will respect the Intellectual property rights of each other. If the decision not to peruse a collaborative activity is taken, all the information shall be returned to the rightful/source owner.
8. The parties mutually agree to share infrastructure facilities like laboratories, class rooms, library, etc. whenever required for execution of the various programs as per the mutually agreed schedule and conditions.
9. Associated companies with TECHINTERN can also conduct workshop for the benefit of the students.
10. Providing quality of education to the students will be responsibility of TECHINTERN.
11. Each party shall appoint one nodal officer to take periodically review and identify ways to strengthen cooperation between both the parties.

Handwritten signatures in blue ink.

Best Practice 2

1. Title of the Practice :-

Internships in industries/companies, plays a vital role as part of Students Development Program, adding valuable insight into industry and getting placements good companies.

2. Objectives of the Practice:-

- To give exposure to the student to be familiar with an environment, expectations of performance professional practices in both private/public sector industries / companies.
- To gained experience in developing technical skills they learned in classrooms such as teamwork, communications and mastered the soft skills required to move into higher-level positions while working.
- Enhance and/or expand the student's knowledge of a particular area(s) of software's.
- To prepare students in the early stages graduation for the internship, expected behaviors in the intern's workplace, identify problems, resolving issues and how to provide services.
- To prepare students as per employer's demands, because they (employer) want those graduate not only have the required education and training for the job, but relevant experience as well whether gained through work and internships / co-ops.

3. The Context: -

An internship is a much focused activity to work in an environment to obtain learning outcomes within their curriculum. During the internship, the knowledge, skills, and attitudes learned in the program can be applied. Before going on the internship, two important factors guiding students development are taken into account 1. Connecting both theoretical and practical knowledge on specific subject with actual work experience and learn new ones; 2. Apply and analyze at least one future skill.

4. The Practice:-

1. ACET and it concerned departments circulate notices(from AICTE etc.) to the students for acquiring internship, professional practices of relevant to technical subject and motivates the students to apply such training and learning environment according to subject area, content and project work.
2. Prepare list of students for internships depending on required functional knowledge and soft skills and encourages interns to be proactive, positive team players during internships.
3. Students also believe that internships are more valuable than their regular courses and are helpful in shaping their future career path and improving their job opportunities.
4. Students actively participate internship training and submit certificate to concern department after completing internship.

Best practices 3

1. Title of the Practice: - Student Development Programs for enhancing technical and soft skills of the students

2. Objectives of the Practice:-

1. To facilitate up-gradation of knowledge, enhance technical and soft skills of the students.
2. To make them aware about modern technology, technical tools and methodologies.
3. To bridge the gap between industry and academics and provide an opportunity to acquire knowledge about current technological developments in relevant fields.
4. To provide activity-based learning platform which in turn encourage students to actively participate in their own learning experience and to develop and incorporate research based insight.

3. The Context :- To cover areas like modern technology, new ideas, strategies and techniques, theory and skills development and up gradation of pedagogy instructional technology, motivation, communication skills, management and alternative relevant problems to stay pace with the dynamical state of affairs in Technical Education. It will not only promote the professional practices relevant to technical education but also motivates the Student to achieve competitive learning environment, thus channelizing development with respect to academic qualifications and personal matters.

4. The Practice:-

1. To promote the activity-based learning practices through practically engaging students in activities relevant to technical education.
2. To motivates the students to attain competitive learning environment thus channelizing development with regard to academic qualifications and personal matters.
3. Student Development Programme (SDP) aims at equipping students with skills and knowledge that are essential for inculcating entrepreneurial values and guiding them for their progress towards entrepreneurial career.

The Spoken Tutorial Project

- Self-explanatory: uses simple language
- Audio-video: uses multisensory approach
- Small duration: has better retention
- Learner-centered: learn at your own pace
- Learning by doing: learn and practise simultaneously
- Empowerment: learn a new FLOSS (Free/Libre and Open Source Software)

Target Group

- Students- High School and College
- Working professional- Software users, developers and trainers
- Research scholars
- Community at large

Workshops

The Spoken Tutorial Project Team conducts workshops on C and C++ and other FLOSS using spoken tutorials and gives certificates to those who pass an online test. For more details, please visit <https://spoken-tutorial.org>

Forum

We have developed a beginner friendly Forum to answer specific questions pertaining to any part of a particular tutorial. For more details, please visit <https://forums.spoken-tutorial.org>.

Prof. Sadia Faruqi

The Spoken Tutorial Project is funded by the National Mission on Education through Information and Communication Technology, Ministry of Human Resource Development, Government of India.

About C

C is a general-purpose programming language, initially developed by Dennis Ritchie between 1969 and 1973 at Bell Labs. Its design provides constructs that map efficiently to typical machine instructions. C is one of the most widely used programming language and there are very few computer architectures for which a C compiler does not exist.

Features

- C has facilities for structured programming and allows lexical variable scope and recursion.
- All executable code is contained within subroutines, called "functions."
- C program source text is free-format, using the semicolon as a statement terminator and curly braces for grouping blocks of statements.
- Typing is static, but weakly enforced: all data has a type, but implicit conversions can be performed; for instance, characters can be used as integers.
- Complex functionality such as I/O, string manipulation, and mathematical functions are easy to implement with library routines.

About C++

- C++ is a statically typed, free-form, compiled, general-purpose programming language. It was developed by Bjarne Stroustrup starting in 1979, at Bell Labs.
- It adds object-oriented features such as classes, and other enhancements to the C programming language.

- The language began as enhancements to C, first adding classes, then virtual functions, operator overloading, multiple inheritances, templates, and exception handling among other features.

- C++ is also one of the most popular programming languages and can be implemented on most hardware and OS platforms.

- As an efficient compiler to native code, its application domains include:

- Systems software
- Application software
- Device drivers
- Embedded software
- High-performance server and client applications
- Entertainment software like video games

Features

- Classes: By using classes, we can create user-defined data types. A class is the collection of a set of data and code. An object is the instance of a class.
- Inheritance: Allows one data type to acquire properties of other data types. This provides the idea of reusability, that means we can add new features to an existing class without

modifying it.

- Data Abstraction and Encapsulation: Encapsulation means hiding data from the data structures. Here, the data is accessible only the functions that are allowed to access it. Abstraction means representing essential features without including background details.
- Polymorphism: means one interface can be used for multiple implementations, so that object can behave differently for each implementation.
- Dynamic Binding: At runtime, the code matching the object under the current reference will be called.

C and C++ Advantages

- Powerful and flexible: C/C++ are used for developing operating systems, compilers, parsers, interpreters, word processors, search engines and graphic programs.
- Support: C requires less runtime support
- Portable programming language: A variety of C/C++-program written for one computer system can be compiled and run on another system, with little or no change.
- Modular: Written in routines called functions and classes (C++), programs can be used in other applications or programs.
- Preferred by professional programmers: A variety of C/C++ resources and helpful supports are widely available.
- Standardised: Many standards have been documented, maintained and updated for C and C++ ~~boards~~ ^{standards} references.

ACADEMIC SESSION 2020-2021

Best practices 4

1. Title of the Practice: - Faculty Development Program knowledge up-gradation for staff to improve teaching learning process

2. Objectives of the Practice:-

1. To facilitate up-gradation of knowledge, enhance teaching and different skills of the faculty.
2. To make them aware about modern technology, teaching tools and methodologies. It provides an opportunity to acquire knowledge about current technological developments in relevant fields.
3. To encourage faculty members to develop and incorporate research based insight into their teaching.
4. To motivate faculty members to develop contents and innovative teaching learning methodologies with student centric approach.

3. The Context:-

To cover areas like technical education policy, new ideas, strategies and techniques, theory and skills development and up gradation of pedagogy instructional technology, motivation, communication skills, management and alternative relevant problems to stay pace with the dynamical state of affairs in Technical Education. It will not only promote the professional practices relevant to technical education but also motivates the faculty to achieve competitive teaching and learning environment, thus channelizing development with respect to academic qualifications and personal matters.

4. The Practice :-

1. To promote the professional practices relevant to technical education.
2. To motivates the faculty to attain competitive teaching and learning environment thus channelizing development with regard to academic qualifications and personal matters.
3. Faculty Development Programme (FDP) aims at equipping teachers with skills and knowledge that are essential for inculcating entrepreneurial values in students and guiding and monitoring their progress towards entrepreneurial career

About the Spoken Tutorial project

- Self explanatory - uses simple language
- Audio-video - uses multimedial approach
- Small duration - has better retention
- Learner-centered - learn at your own pace
- Learning by doing - learn and practice
- Simultaneous empowerment - learn a new FOSS

Target Audience

- Any Teacher/Trainer
- System Administrators
- Site Administrators

Workshop

The Spoken Tutorial Project Team conducts workshops on Moodle and other FOSS using spoken tutorials and gives certificates to those who pass an online test.

For more details, please write to contact@spoken-tutorial.org

Prof. Sedia Padka

The Spoken Tutorial Project is funded by the National Mission on Education through Information and Communication Technology, Ministry of Human Resource Development, Government of India.

Introduction

- Moodle is a Learning Management System (LMS)
- It is free/Libre and open source software
- It helps teachers and educators to create an online courses for adaptive and customized learning
- It is used by many small and large educational institutions to create and deliver courses online to their students

Download and Installation

Prerequisites for installing Moodle

- To install Moodle 3.3, the machine should support:
 - Apache 2.x (or higher version)
 - MariaDB 5.5.30 (or any higher version)
 - PHP 5.4.4 +(or any higher version)
- Add user and create a database for Moodle using phpMyadmin
- Start XAMPP service

Installing Moodle on Local Server

- Download Moodle from <https://download.moodle.org>

Features

- Moodle works on Linux, Windows and Mac operating systems
- Moodle is easy to navigate on all devices
- The security controls keep our data safe and protected
- It has powerful features that empower both teachers and learners
- The Moodle user community and forum very active and helpful
- Free plugins available in Moodle make it feature-rich
- It has detailed reports on activity and participation at course and site level
- It helps in collaborative as well as personalized learning
- It has basic features such as file upload, assignments, quizzes, notifications, etc.

- Advanced features such as forums, wikis, etc. can be used by learners

Who can use Moodle LMS?

- Educational institutions like universities, colleges, schools and coaching institutes
- Businesses for employee training and orientation
- Hospital and health care training programmer
- Any eLearning based institution

Spoken Tutorials in Moodle Series:

- Overview of Moodle

Moodle site administrators

- Getting Ready for Moodle Installation
- Installing Moodle on Local Server
- Admin dashboard
- Blocks in Admin Dashboard
- Categories in Moodle
- Courses in Moodle
- Users in Moodle
- User Roles in Moodle

Teachers

- Teachers Dashboard in Moodle
- Course Administration in Moodle
- Formatting Course material in Moodle
- Uploading and editing resources in Moodle
- Forums and Assignments in Moodle
- Question bank in Moodle
- Quiz in Moodle
- Enroll Students and Communicate in Moodle
